AN 2011-2012

## SPECIAL EDITION

This special edition of Academic Notes is being produced to present a number of prerequisite changes to class. One year ago, when prerequisite/co-requisite checking was “turned on” for student registration, a number of prerequisite problems were identified on courses and temporary solutions were entered in Banner to facilitate registration and make the auto-check work appropriately. Programs were given a year to make those temporary changes permanent.

The following courses represent temporary changes that programs have determined they would like to make permanent and we have chosen this special edition of Academic Notes to highlight these and facilitate the process before Fall 2012 registration begins.
